SUMMARY

Manufacturing Engineering graduate with experience in process monitoring, and quality control and New Product Introduction (NPI) in manufacturing environments. Skilled in data analysis, performing quality inspection, and supporting process improvement. Detail-oriented and proactive team player seeking to contribute to product development and process improvement in a fast-paced environment.

SKILLS & CERTIFICATIONS

- **Engineering & Design Tools:** SolidWorks, Fusion 360, ANSYS
- **Data Analysis & Programming:** Minitab, Microsoft Excel, Basic C++
- **Certifications:** Lean Six Sigma (Yellow Belt)
- **Languages:** English (Fluent), Chinese (Fluent), Malay (Proficient), German (Basic-A1)

EDUCATION

Universiti Teknikal Malaysia Melaka (UTeM) Mar 2023 – Mar 2026

- Bachelor of Manufacturing Engineering with Honours (CGPA: 3.76/4.0)

Hochschule Hannover - University of Applied Sciences and Arts, Germany Sep 2024 – Jan 2025

- Exchange Semester in Mechanical Engineering
- DAAD Scholarship Recipient

Universiti Teknikal Malaysia Melaka (UTeM) Oct 2020 – Jan 2023

- Diploma of Manufacturing Engineering (CGPA: 3.76/4.0)

WORK EXPERIENCE

V.S. Industry Berhad – Quality Control Intern Jul 2025 – Sep 2025

- Supported NPI by monitoring Cpk for 100+ CTQ features during product ramp-up
- Interpreted engineering drawings and inspection requirements to ensure product compliance
- Collaborated with engineers and production teams in root cause analysis
- Utilized Excel and Minitab for data tracking, analysis, and reporting

Boingtech Malaysia Sdn. Bhd – Quality Control Intern Oct 2022 – Jan 2023

- Performed IQC, IPQC, and OQC to ensure materials and products met specifications
- Identified non-conforming materials, and supported corrective and preventive actions
- Supported production flow by ensuring material readiness for manufacturing
- Assisted engineers in equipment testing, reliability checks, and basic failure analysis

PROJECTS

Hydrogen Fuel Cell Prototype

- Assisted in design and assembly of hydrogen sealing for prototype development
- Conducted testing to identify leakage and failure points, and proposed design improvements
- Coordinated testing activities and documented results to support validation process

Performance Enhancement of Natural Fibre PLA Composites (Final Year Project)

- Developed and integrated PaArg into PLA-based natural fibre composites to enhance flame retardancy performance
- Conducted material characterization (SEM, DSC) to evaluate morphology, composition & performance
- Analysed results to assess improvements in fire resistance for engineering applications

LEADERSHIP & ACTIVITIES

- Executive Committee, SME Technologist – Organized engineering workshops
- Head of External Affairs, Studies Guidance Team - Coordinated with external collaborators & internal stakeholders
